

	Description of Bug (be specific about what is not working)	Location of Bug (file, class, method, etc)	Steps to Recreate Bug and/or Test Case #	Root Cause Analysis Notes:
	Sometimes the input files do not recognize the first line of input correctly. The program thinks that "OPL" does not equal "OPL" in a sense of the characters in each string.	readln() inside of Main.java	Simply copy the contents of the file and paste them in a new CSV file, saving that file as a new name. Delete the old file.	We don't know why this is. Maybe there's an extra '/' character that we can't see that makes .equals() return something other than 0.

No bugs were found in our testing and all known bugs were fixed from Project 1.
